Amir Mendelson

Expert Full Stack developer.

Full stack developer with over 10 years of experience working on various complex web products. Passionate about building beautiful, solid, and scalable web products.

Experience:

AM Systems – Full Stack Developer Aug 2020 - Present

- Worked on multiple complex web systems for clients. (Inc. CRM, SaaS products and more).
- Full stack development using React (Next.js) for frontend and PHP (Lumen) for backend.
- Helped clients make their products more precise and mature.

PowerDrop – Full Stack Developer Apr 2019 - Present

- Created a successful SaaS product from the ground up, resulting in \$100K+ annual income, 2,000+ active users and 50,000 registrations since launch.
- Developed both the front and backend of the product using React and Laravel's Lumen Framework.
- Planning and maintaining of a very large database running on MySQL 8. Over 1.5TB of data.
- Built a complex, real-time scraping array for multiple ecommerce websites. Over 5,000,000 daily requests.
- Designed the full user experience flow of the product.

GameKeys – Full Stack Developer Jan 2015 - Apr 2017

- Developed an eCommerce site with automatic order processing from reseller API.
- Full stack development using PHP & JavaScript.
- Designed the website and customer experience flow to increase customer conversions.
- Search engine optimization, resulting in a monthly traffic of 30,000 unique visitors.

IDF – Intelligence Assessor Oct 2014 - Oct 2017

- Served as an Intelligence Assessor at the National Fraud Investigation Unit.
- Worked on a program which automatically does my daily routine reports.
